## The Security & Safety Things Platform

**Camera OS and Infrastructure**  
Free and secure OS for deployment of multiple apps across cameras from many vendors. Based on AOSP.

**Device Management**  
Install and manage apps and cameras in on- and offline environments including digital twin capabilities.

**Software Development Environment**  
Documentation and tools for efficient development and publication of video analytic apps.

**Application Store**  
A catalogue of apps to browse, evaluate, purchase and download the solutions you need.
